New sensitive and rapid spectrophotometric methods for the determination of four analgesic drugs namely, nalbuphine (NALB), naltrexone (NALT), morphine (MORF) and tramadol (TRAM) in pharmaceutical formulations were developed and optimized. In both methods, the amount of NBS reacted corresponds to the amount of drugs. Abstract: A spectrophotometric method has been proposed for the determination of four phenolic drugs; salbutamol, ritodrine, amoxicillin and isoxsuprine. Key words: Spectrophotometry, p-Chloranilic acid, Drugs, Quantification, Validation. p-Chloranilic acid (p-CA) is a π -electron acceptor and has been used for the determination of amino acids, aliphatic, aromatic amines and drugs with potential donor ability. Simple, sensitive and selective methods are proposed for the spectrophotometric determination of drugs, viz., tetracycline HCl, nifurtimox. The main aim of the present work was to develop specific, rapid, and cost-effective methods for the determination of selected drugs (ITO, MID, DIC, MES, and SUM) in pure form and in tablet formulation by UV-Visible spectrophotometry. The chemical structures of the studied drugs are shown in Figure 1. Abstract - Introduction - Experimental. Spectrophotometric determination of some drugs for osteoporosis. Taha EA(1), Youssef NF. Author information: (1) National Organisation for Drug Control and. Abstract: Simple, sensitive and selective methods are developed for the spectrophotometric determination of drugs, viz., Montelukast sodium, Prasugrel. Spectrophotometric method is described for the determination of drugs through charge transfer complex formation with iodine acceptor. This method is based. A Simple And Rapid Spectrophotometric Determination Of Aripiprazole In Pharmaceutical Dosage Form?, Int. J. Drug Dev. & Res., Jan-March, 3(1). Spectrophotometric analysis of Drugs. 1. thecomicbookguide.com & thecomicbookguide.comeshwarlu* Dept. Of Chemistry, Osmania University, Hyderabad Quantitative. Keywords: Rosuvastatin/spectrophotometric determination. Rosuvastatin/charge transfer for the determination of this drug (El-Bagary, Elkady, Kadry,) in. ARTICLE. Sensitive spectrophotometric determination of lamotrigine in bulk drug and pharmaceutical formulations using bromocresol green. N. Rajendraprasad. PDF A new spectrophotometric method for the determination of each dapsone and metoclopramide HCl alone in two different tablet preparations is described. Download Citation on ResearchGate On Jan 1, , thecomicbookguide.com Reddy and others published Kinetic Spectrophotometric Determination of Drugs Based On. Vol.3, No.4, pp, Oct-Dec Spectrophotometric determination of drugs using 2,3-Dichloro 5,6-dicyano P-. Benzoquinone as Analytical reagent. The coloration method with one step formation of hydroxamate from carboxylic acid was applied to the spectrophotometric determination of drug formulations. Spectrophotometric Determination of Some Nonsteroidal Anti-Inflammatory Drugs by Oxidative Coupling Reaction. Mallikarjuna H1, Shivaprasad KH2 and.
